THE COMPANY KNOWN TO THE PUBLIC
as the "Mississippi Valley Navigation
Company of the South and Weat," is organised under a charter from the State of Louislana. This charter authorizes a capital
the privilege of extension to one million.
That the public may know the exact enject of
the Company, the third article of the charter
is given entire as follows:

"The object of this Company is to construct as otherwise to procure and maintain
one or more steamboats or other vessels, to
run on and navigate the Mississippi river, or
the tributaries, for the purpose of ce rying
freight, mails and nessdagers; to construct
docks wharves, buildings and such other consingulions as may be necessary to the building and repairing of vessels, and generally to
exercise such incidental powers and privilegos as are hereby or may be conferred on
them for the purposes afcereated.

The tompany propose, under the provisionof this charter to construct a line of Low
parasstruct Steamboats to run between the difterm; parts on the Mississippi river and its
tributaries. They will carry less steam,
make better time, land freight and passengers without rounding-to, and, by means of
endless chalms and elevators, receive grain in
balk and discharge it (it for ahipment) directly on basard the vessel intonied to receive
it, insiend of the present mode of poting it
first on shore, thereby saving time, labor and
expense. The Boats will also be divided into
distinct compartments—so, if they encounter
sings, or any acciding the apparatus are avitinguishing fire by steam, and conducting water
over the vessel for domissis use; and will be
in every respect after, swiffer, and botter
and at a cheaper rate than any boats now
mygating the Mississippi river.
